September

We have made it to September

This is halfway through hurricane season

It is now time to make sure you have your final preparations done. Have you made sure your car is in good service and can be used for evacuation? If you will not evacuate, have you decided where you will move it to so it is out of the flood zone?

This is also a good time to check those batteries on your smoke detectors. Check out those fire extinguishers to make sure that they are in date as well.

If you stay during a hurricane, be prepared to have no power and no elevator. This is a safety precaution as the elevator will be parked up high to protect it. The power could be turned off or just go off depending on the storm.

If you have bikes, be ready to take them up to your unit to ride out the storm. If you have bikes, they can become a projectile, and you will be responsible for damage done by your bike. For example, if it breaks through the sliding glass in the conference room. This could have been preventable.

If you have patio furniture, please move it inside as it can also be a projectile and cause damage.

But above all, please help your neighbors get ready if we have one headed our way. We learned last year; it takes many people to get the building ready and even more to clean up the damage.

We have a Facebook page and it is a private group and you can join by answering a few questions. This is a great way to stay in touch with your neighbors. It can be found at 644 island way.

Upcoming Events:

Don't miss out

September 28, 2025 – 6 pm
Board Meeting in the conference room
